VILNIUS, LITHUANIA
JUNE, 15-18

Türkiye

**Turkish
Houseware**

ABOUT TURKISH HOUSEWARE

Turkish manufacturers and entrepreneurs are investing at an increasing rate to meet the demand for plastic, steel, copper and aluminium houseware, along with glassware, ceramics, porcelain and cutlery. This has also been accompanied by investments in modern technology and marketing techniques to gain a greater share of target markets.

The vision of the Turkish Houseware Industry is to become one of the leading global houseware suppliers through concentrating its entire energy, sources, knowledge and experience purely on the industry, by fostering development with its customers, markets and its competitive practices. In accordance with this vision, Turkish Houseware companies focus on creating differentiation in product design and branding, use of advanced technology and of high quality manufacturing, and accordingly creating a good image for Turkish products in international markets, in addition to their highly competitive prices. With this perspective, Turkish Houseware export potential is increasing rapidly and today our products are sold in more than 160 (one hundred and sixty) countries.

ABOUT İKMİB

Istanbul Chemicals and Chemical Products Exporters Association (İKMİB) was founded in Istanbul in 1991 and currently has around 8000 members. The main aim of the organisation is to help its members increase the export volumes and the success of their companies in the chemical products sector. In addition, İKMİB is also committed to increasing the competitive edge of its members in their everyday business operations. The organisation also looks to provide sectoral collaboration, support its members with any problems relating to export/trade activities, organising trade fairs, arranging promotional activities and founding laboratories.

Furthermore, it arranges national and international meetings for its exporters, organises 'trade missions' composed of Turkish exporters to the target markets and prepares annual reports on the performance of the sector as a whole, as well as its target sub-sectors. The members of İKMİB cover a broad spectrum of chemical exporting industries, which range from the manufacturers of plastic packaging materials; mineral fuels; mineral oils; soaps & detergents; inorganic chemicals and polymers to inorganic chemicals; pharmaceutical products' organic chemicals; dyes, pigments and other colouring articles including paints and varnishes; rubber articles; fertilisers and others including agricultural chemicals, as well as textile auxiliary chemicals.
